

European Exascale Software Initiative

SC'09 - IESP BoF

November 2009

Jean-Yves Berthou

LEADING THE ENERGY CHANGE

European Exascale Software Initiative (EESI)

Context

Past and actual initiatives that evaluate the potential benefit of Peta/Exaflop computing:

- HPC Eur - European High Performance Computing Initiative, "The Scientific Case for a European Super Computing Infrastructure", Petascale Computing in Europe - input for the
- ESFRI Roadmap process, spring 2006
- PRACE, Partnership for Advanced Computing in Europe (PRACE)
- DOE Workshop series, <http://www.exascale.org/mediawiki/images/a/a7/Messina-doeexa.pdf>, extremecomputing.labworks.org/
- *IESP identified US contribution:* www.exascale.org/iesp/IESP:Documents#Relevant_background_material

“The guiding purpose of the IESP is to empower ultrahigh resolution and data intensive science and engineering research through the year 2020 by developing a plan for 1) a common, high quality computational environment for peta/exascale systems and for 2) catalyzing, coordinating, and sustaining the effort of the international open source software community to create that environment as quickly as possible.”

European Exascale Software Initiative (EESI)

Main goals

Build a European vision and roadmap to address the challenge of Peta and Exascale computation and simulation

- Investigate how Europe is located, its strengths and weaknesses, in the overall international HPC landscape and competition
- Identify priority actions
- Identify the sources of competitiveness for Europe induced by the development of Peta/Exascale solutions and usages
- Identify and stimulate opportunities of worldwide **collaborations**

European Exascale Software Initiative (EESI)

Main tasks

Coordination of the European participation in IESP

Make a thorough assessment of needs, issues and strategies

Develop a coordinated software roadmap

Provide a framework for organizing the software research community

Engage and coordinate vendor community in crosscutting efforts

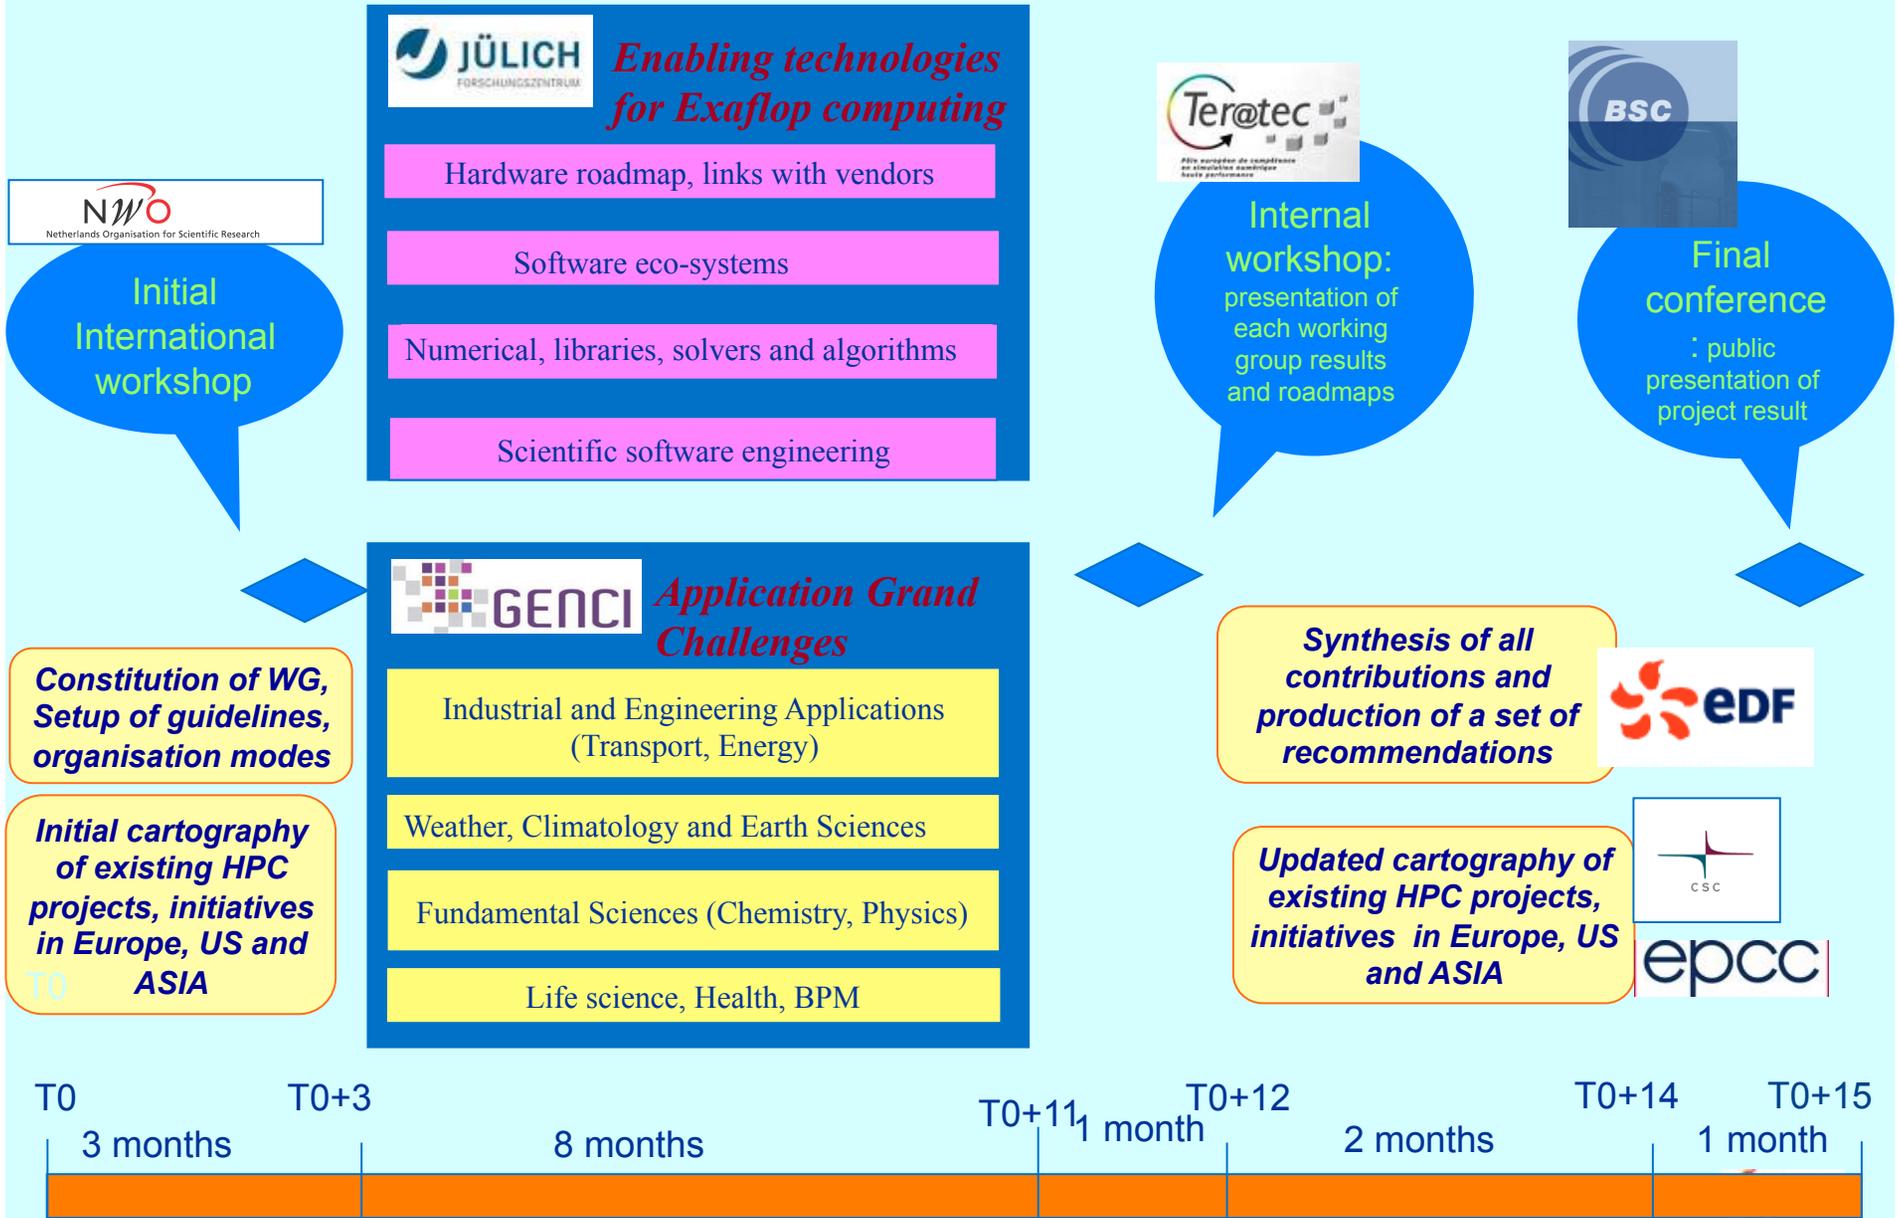

Encourage and facilitate collaboration in education and training

Cartography of existing HPC projects and initiatives in Europe, US and ASIA

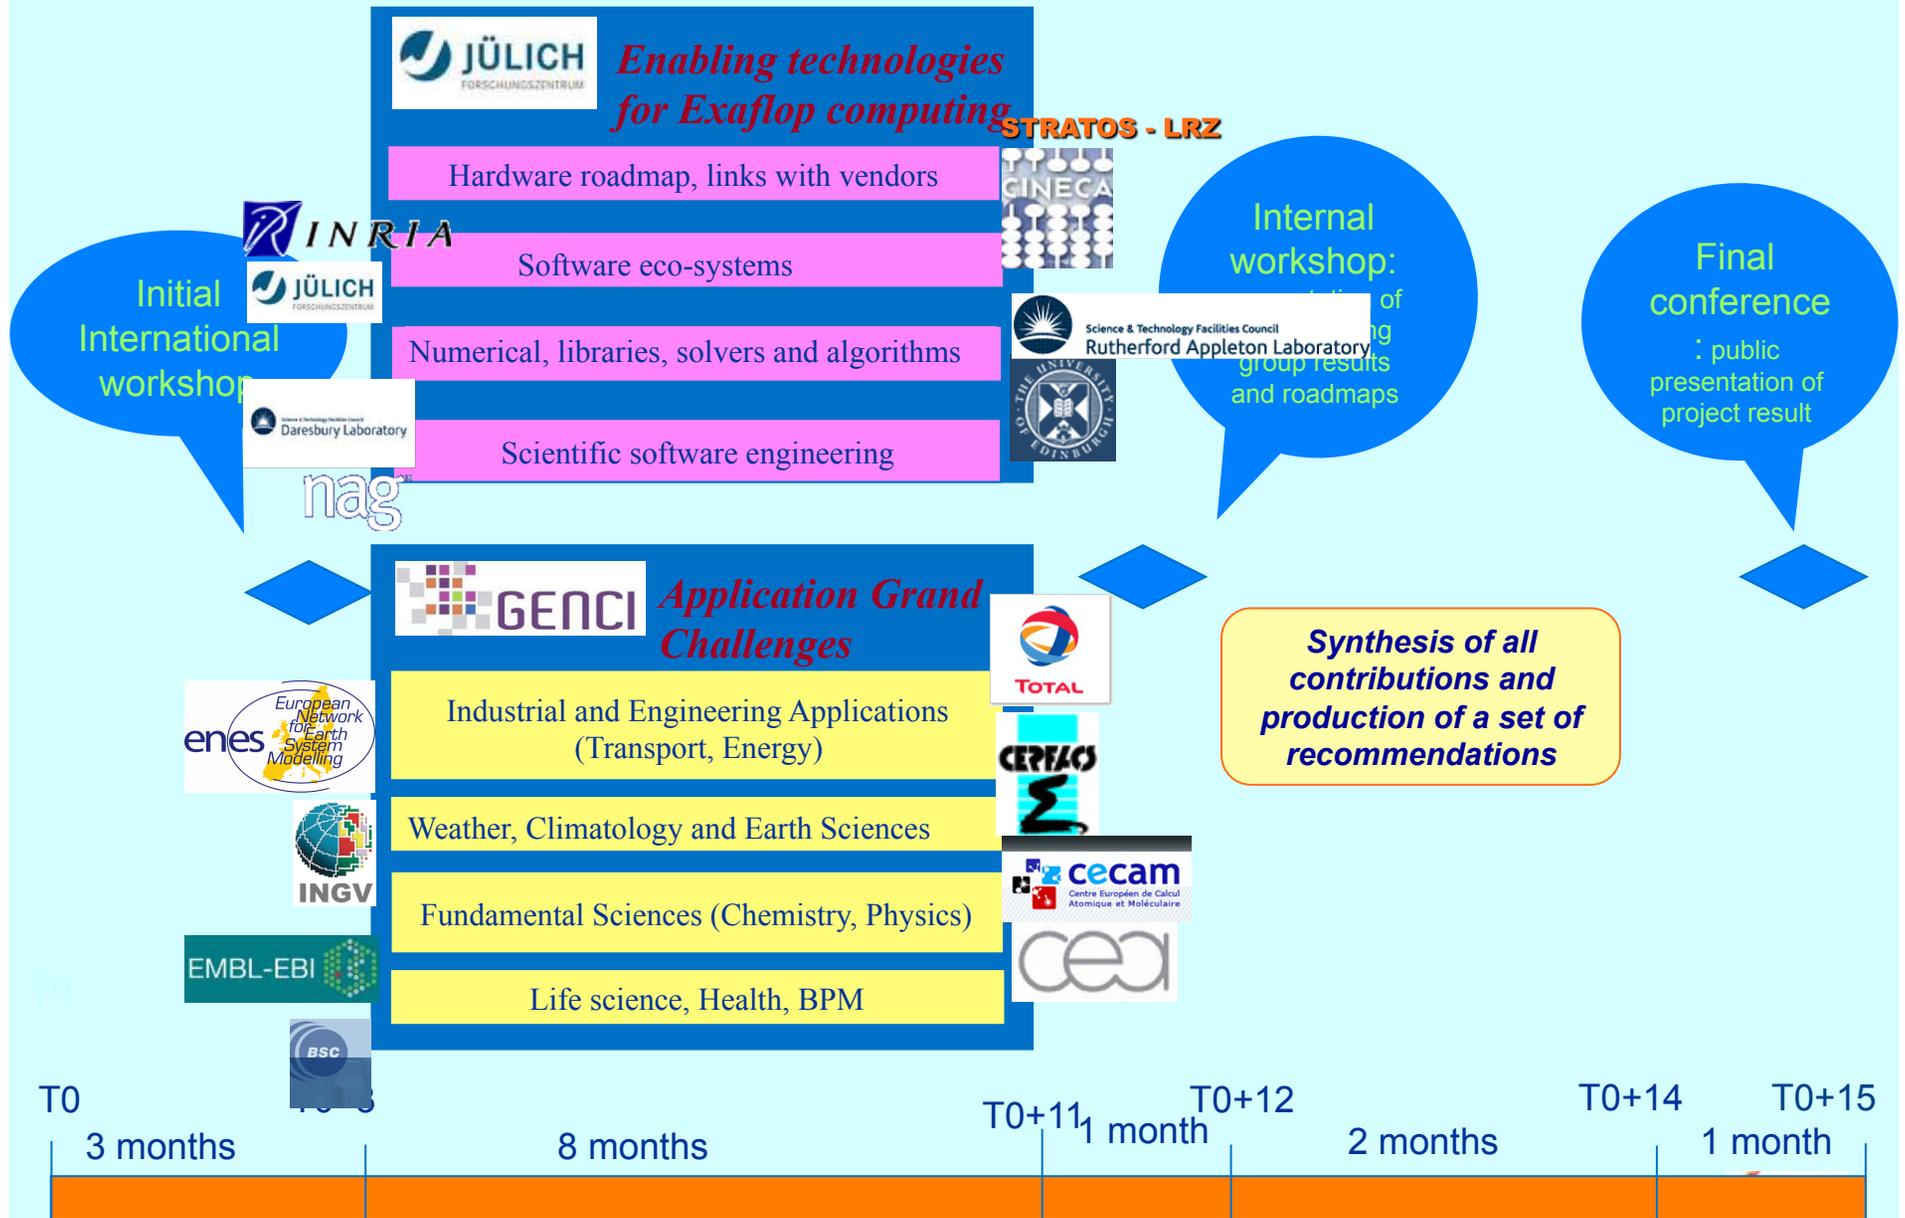

Coordination of “*disciplinary working groups*” at the European level

Synthesis, dissemination and **recommendation** to the European Commission

European Exascale Software Initiative AGENDA

European Exascale Software Initiative AGENDA

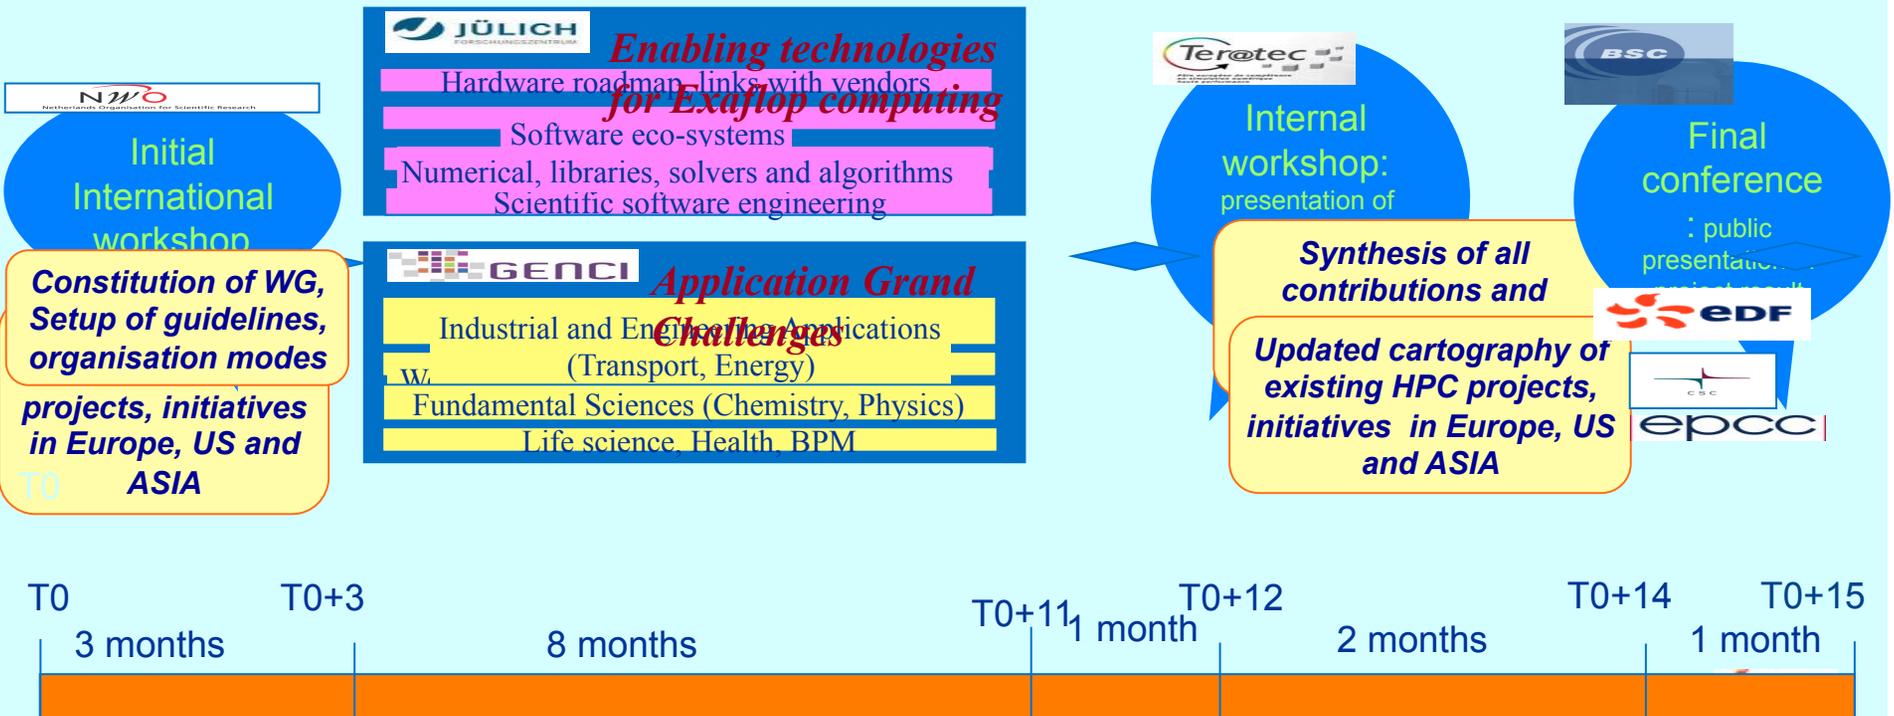

European Exascale Software Initiative AGENDA

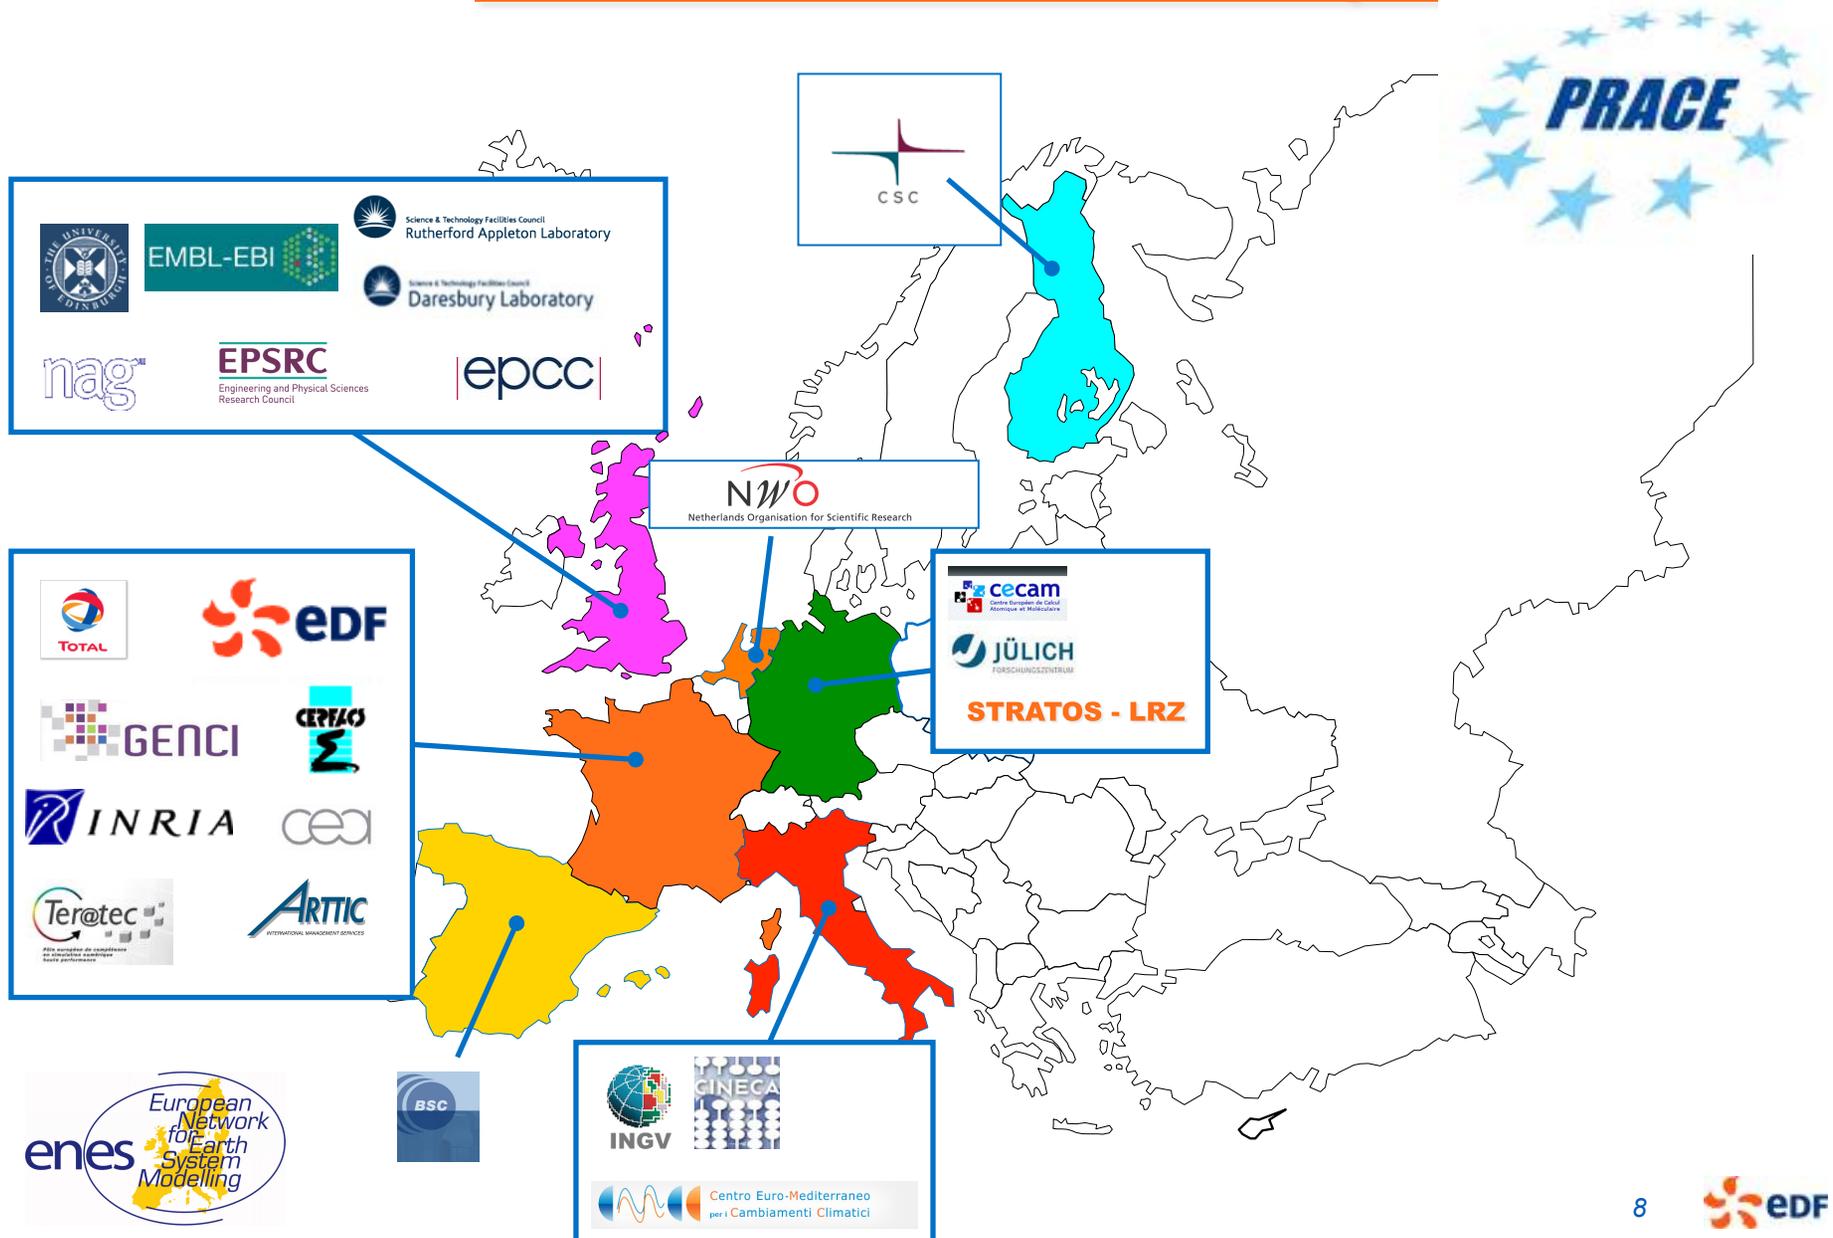

Link with US and ASIA

Preparation and participation to IESP boards/meetings, transfer to the EESI partners/contributors, identification of US, ASIA and European cross actions

EESI Partners In Europe

EESI Partners around the world
